- 4.** Collections
- 5.** My List
- 6.** Your Profile
- 7.** Admin: Managing Media
- 8.** Admin: Categories & Tags
- 9.** Admin: Users
- 10.** Admin: Slideshow
- 11.** Tips & Troubleshooting

1. Getting Started

Signing in

1. Open the Library Portal in your browser.
2. On the landing page, click **LOGIN** (top-right).
3. Enter your **username** (not email) and password.
4. Tick **Remember me** to stay signed in across sessions on this device.
5. Click **Login**. You'll land on the media browser.

Forgot your password?

Ask an administrator to reset it for you from the Users page. If you *are* an admin, sign in once with the seeded password (provided to you on first deployment) and change it from **Profile** → **Change password**.

Top-bar navigation

- **Library Portal logo** — returns to the home page.
- **Your name (right)** — opens a dropdown with **Profile** and **Logout**.

Sidebar (left)

On medium screens and up, the sidebar shows your sections. Use the chevron at the top to collapse it to icons-only for more workspace. On small screens, tap the menu label at the top to slide it in as a drawer.

2. Browsing Media

The **Media** page is your starting point for finding items in the library.

Categories sidebar (page-level)

The narrow left panel on the media page lets you scope by category. Counts beside each entry show how many items match.

Search

Use the search bar at the top of the categories card. Type your query and press **Search**; clear it with the **Clear** link or by emptying the box (the page auto-resets once empty).

Filters

Pill	What it does
	Removes category filter.
Annual Reports / Magazines / ...	Filters by category — select multiple to widen the match.
The ... button	Reveals the rest of the categories when there are more than five.

Tag filter (left card)

Tap any hashtag chip to add it to the URL. Click it again to remove. Use **Clear** to drop all selected tags.

Sort & view

- **Newest / Oldest** (right-side pill) — flips the sort order on the date the row was added.
- **Grid / List** toggle (square-tile icon, also on the right) — switches between thumbnail tiles and a compact row layout. Your choice is remembered for 30 days.

Pagination

12 items per page. The pagination row shows "Showing X – Y of Z results"; click the numbered buttons to jump.

Tip. Filters combine. You can ask for "books in the Annual Reports category tagged `#corporate` sorted oldest first" — every selector you click is added to the URL.

3. Viewing a Single Item

Click any tile or row to open the item's details page.

What you'll see

- **Title card** — small thumbnail, date, title, and a type badge ("PHOTO", "VIDEO", "BOOK").
- **Viewer** — image, video player, or PDF iframe depending on the type. Photos and books also have a fullscreen button.
- **Details (right)** — type, status, dates, view count, optional location and author, the categories and tags it belongs to, and any collection it's in.
- **Related items** — items that share the same set of categories AND tags appear below the viewer.
- **Actions card (right)** — Edit Media (admins), Download (only when it was uploaded directly), and Add to / Remove from My List.

Back navigation

The top-left link is contextual — "Back to media", "Back to photos/videos/books", or "Back to collections" depending on how you got here.

4. Collections

Browsing collections

1. Use the sidebar **Collection** link or visit `/collections`.
2. You'll see every collection as a row with item count and a chevron.
3. Click a row to open the collection.

Inside a collection

- **Preview pane** — cycle through the items inline with prev/next chevrons, or click any thumbnail in the strip below.
- **Media list** — every item in the collection, click to open in collection context.
- **Details panel** — counts per type, creation date.
- **Actions:**
 - **Edit Collection** (admin) — rename or change membership.
 - **Download (.zip)** — bundles every uploaded file in the collection into a single archive.
 - **Add to My List / Remove from My List** — saves the whole collection to your personal list.
 - **Delete Collection** (admin) — drops the collection. The media files stay.

5. My List

My List is your personal shelf. Use it to save items you want quick access to later.

What it can hold

- **Saved media** — individual photos, videos, books.
- **Saved collections** — entire collections.

Adding items

Where	How
-------	-----

From any media's details page	Click Add to My List in the Actions card.
From any collection's details page	Click Add to My List in the Actions card.
In bulk	On the My List page, click + Add to My List . The picker has two tabs (Media / Collections), filterable by name, with live counters. Tick what you want and click Save list .

Removing items

Open the My List page and click the red trash icon on any row. Or untick it inside the bulk picker.

6. Your Profile

Open it

Click your name (top right) → **Profile**.

What's on the page

- **Left card** — read-only summary: avatar (initial), name, email, username, role, member-since date.
- **Right card — Change password:**
 1. Type your current password.
 2. Choose a new password (min. 8 characters).
 3. Re-type it in the confirmation field.
 4. Click **Update password**. A green banner confirms success.

Heads up. If the current password doesn't match, you'll see an inline error and the form stays open. No password gets changed.

7. Admin: Managing Media

Status workflow

Status	Who sees it	Used for
Draft	Admins only	Work-in-progress
Published	Everyone	Live, visible
Archived	Admins only	Retired but kept

Adding media

1. On the Media page, click + **Add Media**.
2. Fill in **Title**.
3. Pick the **Type** — Photo, Video, or Book. The file input will only accept matching file types.
4. Pick a **Status** — start with Draft if you're not ready to publish.
5. Set an optional **Date** (the event date — separate from the upload date).
6. Choose a **Source**:
 - **Upload file** — max 50 MB, type-restricted (images for Photo, videos for Video, PDF/DOC/DOCX/XLS/XLSX for Book).
 - **Use link** — paste a direct URL to a hosted file.
7. (Books only) Add a **Location** — physical shelf reference.
8. Upload a **Thumbnail** (optional, max 1 MB).
9. Pick one or more **Categories** and **Tags**. Use the **Manage** shortcut to add new ones.
10. Pick a **Collection** (optional) if this item belongs to one.

11. Click **Upload media**. You'll be redirected to the new item's details page.

Editing or deleting media

Open any media's details page → use the **Actions** card on the right. **Delete** shows a confirmation popup; the file and metadata are removed from disk and DB.

Status tabs

The Media page header has tabs: **All** · **Draft** · **Published** · **Archived** (admins only). Each shows a live count that respects whatever other filters you have active.

Add Categories

From the Add Media form, the **Manage** chip next to Categories opens the Categories page in a new tab. Categories used by any media cannot be deleted.

8. Admin: Categories & Tags

Both are similar: a name field, an Add button, then a table of existing entries with edit-in-place and delete.

Page	URL	Notes
Categories	<code>/categories</code>	One name, used to group media. Cannot delete while in use.
Tags	<code>/tags</code>	Hash-style labels. Cannot delete while in use.

9. Admin: Users

Adding a user

1. From the sidebar, click **Users**.

2. Click + **Add User**.
3. Fill in **Name, Username, Email**.
4. Set the initial **Password** (min 8 chars) and confirm it.
5. Pick a **Role**:
 - **Admin** — full access.
 - **User** — browse + My List + profile only.
6. Click **Create user**.

Editing a user

From the table, click **Edit**. You can leave the password fields blank to keep the existing password. Email and username can be changed but must remain unique.

Deleting a user

From the table, click **Delete** and confirm. *You cannot delete your own account.*

10. Admin: Slideshow

The home-page hero carousel pulls from the **Slideshow** table. Use this page to add or remove slides.

1. From the sidebar, click **Slideshow**.
2. Type a **Slide title** and pick an image (max 2 MB).
3. Click + **Add Slide**. The new slide appears in the grid below.
4. Click the red round button on any tile to delete that slide.

11. Tips & Troubleshooting

Symptom	Fix
Uploaded image shows a generic logo on the listing	The file extension didn't match the media type. Re-upload with a matching extension, or add a proper thumbnail.
"Cannot delete — still assigned" when removing a category/tag	Reassign the media to a different category/tag first, then delete.
Page numbers reset when toggling sort	By design — sort changes the ordering, so we drop back to page 1.
Forgot which collection an item belongs to	Open the item; the Collection card on the right shows it.
Drafts disappear when I switch from admin to a non-admin account	Non-admins never see drafts or archived rows. Switch back to your admin account.
The "Download" button on a book is missing	That book was added with Use link , not uploaded. There's nothing to download locally.
